**Beautiful Bronze**  
#37

**Shimmering Green**  
#38

## New Shimmering Colors help Brighten Your Day

Flow introduces three new exciting fabric colors: New Electric Blue, Beautiful Bronze, and Shimmering Green. Shown above in our Bib, Bib with Collar, and Panoramic apron styles, these new colors reflect light in a cool diamond pattern to brighten any dental office.

Made in the USA from quality materials, sandwiched between an easy-clean vinyl front and a tear-resistant non-slip back, Flow aprons have become the reasonably-priced industry standard. Dental professionals trust Flow aprons to protect their patients and deliver many years of reliable service.

Flow aprons are also available with or without lead. Our No-Lead Aprons are 25% lighter, have the same protective qualities as traditional aprons, and don't require special disposal. They're better for you, better for your patients, and better for the environment! Be sure to specify "NL" when ordering.

Please see the reverse side for complete ordering information. To order, contact your local dealer, call Flow at **1-800-356-9729** or visit **FlowDental.com**.

# Leaded and No Lead X-Ray Protective Aprons from Flow Dental

## Traditional Leaded Aprons

Flow lead protective aprons are the industry standard. Made in the USA from lead rubber sandwiched between an attractive vinyl front and tear-resistant cling back, our aprons clean easily with soap and water. All our leaded aprons are 0.3mm lead equivalency protection and are made to endure years of heavy use.

For maximum coverage, order your apron with a sewn-on thyroid collar. Separate thyroid collars are available as well. Flow also carries the Uni-Hanger, which allows you to hang your apron on a hook or in a closet to prevent folds that can damage the lead lining.

## No Lead Aprons

Our new aprons are made of environmentally friendly lead-free, non-toxic materials. They are 25% lighter and more flexible than conventional lead aprons, but have the same protective qualities! Flow No Lead aprons provide 0.25mm lead equivalency protection, have an easy-clean vinyl front and a tear-resistant cling back.

For maximum coverage, order your apron with a sewn-on thyroid collar. Separate thyroid collars are available as well. Flow also carries the Uni-Hanger, which allows you to hang your apron on a hook or in a closet to prevent folds that can damage the lead lining.
